EDUCATION
SOLUTIONS

HOWARD™
INDUSTRIES, INC.

Customizing your tech products for a school setting is not only a greay way to clearly show ownership over the product but also a great way to build a community and school pride! Make your students feel like they're a part of your school community by providing them with custom-made products sporting your school name, logo, colors, and more!

PROJECT EXAMPLES

Adding your school's logo or name to a product promotes school spirit and helps to deliniate between personal items that students/teachers may have and what items belong to the school.

Choose custom colors for your headsets to match your school colors or to have a fun variety for your students.

Customize backpacks and always-on laptop cases with your schools logo to help boost school spirit and unity.
