White Rock Cybersecurity has partnered with the Strattmont Group as a trusted partner for compliance and cyber assessments. Strattmont Group's expert guidance and AI-driven solutions help you achieve continuous regulatory success while minimizing cyber risk. With decades of experience, they provide actionable, prioritized remediation plans and cyber security assessments to safeguard your school or district. Their advanced tools and GRC platform deliver immediate insights, enabling you to address vulnerabilities quickly and achieve sustainable, long-term security improvements.

Compliance and Assessments

Three Reasons Why Compliance, Cybersecurity, or Risk Assessments Are Necessary:

- **Proactively Identify Vulnerabilities and Gaps:** Regular assessments help uncover security weaknesses, compliance gaps, and risks before they escalate into costly breaches, regulatory fines, or operational disruptions.
- **Meet Regulatory and Industry Requirements:** Staying compliant with frameworks like NIST not only avoids penalties but also demonstrates trustworthiness to clients and partners.
- **Enhance Decision-Making Through Risk Prioritization:** Assessments provide a clear understanding of which risks pose the greatest threat, allowing organizations to allocate resources efficiently for maximum impact.

Services: Compliance and Assessments

NIST 2.0 CSF Assessment: NJECC $94.59/per seat; min. qty 175

Unlock the power of NIST CSF 2.0 with a comprehensive assessment that aligns your security posture with industry best practices and regulatory expectations.
