

ACCOUNTABILITY SUITE

FLEXIBLE TOOLS FOR MODERN EDUCATOR EVALUATION

Mastering Accountability with Confidence

NJECC December to February Promotion- 10% off Staff Accountability

CORE COMPONENTS OF YOUR ACCOUNTABILITY SOLUTION

The Accountability Suite includes interconnected modules for managing educator evaluations, covering classroom observations, growth objectives, and performance calculations. This comprehensive system provides a reliable source of truth for district administrators.

OBSERVE: A Dynamic Observation Tool

- **Flexible Rubric Management:** Manages multiple observation rubrics to align with district policies and contracts.
- **User-Friendly Interface:** Allows observers to document findings and link evidence easily, saving administrative time and enhancing feedback quality.
- **Customizable Weighting:** Manages rubric category weighting and differentiates between announced and unannounced observations, meeting complex requirements.

SLOs/SGOs: Simplified & Standardized Goal Setting

Flexible management for Student Learning Objectives (SLOs) and Student Growth Objectives (SGOs) adapts to district plans without a fixed model. The "SGO Goals Models" feature enables districts to create templates that standardize key calculations, simplifying SGO development for teachers and reducing errors. This approach ensures consistency and allows for fair assessment of overall effectiveness using comprehensive data on observations and goal attainment.

Effectiveness / Performance Pay

The Accountability Suite is completed by the Effectiveness / Performance Pay module. This component serves as the capstone for managing final educator evaluations, bringing the entire accountability process together in a single, cohesive system.
