

# Who's managing your Microsoft Defender Alerts?

I know your answer...so let's fix this and restore your peace! Secure and optimize your Microsoft ecosystem with **Huntress Managed EDR and Managed ITDR**.

## Get the most out of your Microsoft Security Tools with Huntress

Microsoft is at the heart of your school's infrastructure, and we're here to make sure you get the most out of your investment. By using Huntress Managed Endpoint Detection and Response (EDR) and Identity Threat Detection and Response (ITDR), you level up your cybersecurity and get the true value out of your existing Microsoft security tools.

### Microsoft Defender for Endpoint + Huntress Managed EDR

Huntress Managed EDR unleashes the potential of Microsoft Defender for Endpoint and Microsoft Defender for Business.

We supplement our EDR telemetry with additional insight from Microsoft. And like all Huntress solutions, it's backed by our 24/7 human-led SOC. Together, they create a seamless defense that frustrates hackers. You can finally get the value of Microsoft Defender and level up your security at the same time. And the best part? It's included for Managed EDR users.

### Microsoft Defender Antivirus + Huntress Managed EDR

Huntress manages Defender AV as part of Huntress Managed EDR. This allows you to use your budget for the areas that will most impact your organization.

With multi-tenant support from the Huntress dashboard, we centrally manage detections and events, monitor scans and protections, and execute remediation actions for all protected endpoints. Not only will you save money, but you'll also save time by having us do the work for you.

### Microsoft 365 + Huntress Managed ITDR

Built for Microsoft 365 users, Huntress Managed Identity Threat Detection and Response (ITDR) is a fully managed identity protection solution that safeguards businesses against the inbound tidal wave of identity-focused tradecraft.

With Microsoft Entra ID, Microsoft's identity and access management suite, Huntress Managed ITDR takes in Risky User data to illuminate any weak spots in your security strategy and highlight risky behavior. Our experienced threat analysts monitor and respond in real time to critical security threats like session hijacking, credential theft, malicious inbox and forwarding rules, account takeover, and business email compromise (BEC) attempts.

## Huntress + Microsoft:

### Deep Microsoft Integration

We've teamed up with Microsoft as a Microsoft Verified SMB Solution, enabling deeper integration with Microsoft Defender and Microsoft 365. This partnership enables us to detect and respond to threats faster, smarter, and more accurately.

### Fully Managed by Experts

Our elite team of threat hunters and 24/7 Security Operations Center (SOC) continuously monitor and investigate incidents to deliver easy-to-understand alerts and timely responses. We work hard behind the scenes so you can focus on what matters—running your business.

### Human-Led, Technology-Enhanced

We don't solely rely on AI and automation. Our human analysts make sense of the noise, find patterns of shady behavior, and provide actionable insights so you can face sophisticated attackers. Our tech and our team are never separated, and Huntress products are built with our SOC in mind.

# Huntress Security Platform for Education

## Keep Class in Session – Even When Attackers Won’t Sit Still

The Huntress Security Platform delivers fully managed security solutions to protect your endpoints, identities, systems, and data across districts and campuses. This helps you keep learning on track and safeguard staff information, even when attackers target your environment.

Every Huntress solution is backed and operated by our 24/7, AI-assisted Security Operations Center (SOC) and powered by a team of world-renowned threat researchers, hunters, and analysts.

We’re dedicated to stopping cyber threats before they can do damage, so K–12 districts and higher-ed institutions stay protected around the clock.

"Huntress notifies us, investigates, and remediates within minutes, and handles it all for us, before we even log into the platform. Knowing that there’s a full team at Huntress that’s monitoring my environment for me 24/7/365 means if something happens on Christmas morning, I don’t have to drop everything."

Eric Nush, Director of Technology,  
Homer Community Consolidated School District 33C

### Managed EDR

Endpoint protection built for school.

Huntress Managed EDR continuously protects your endpoints with an 8-minute MTTR to find and stop attacks fast for schools, districts, and universities of all sizes.

### Managed ITDR

Modern attackers don’t need malware – just a login.

Huntress Managed ITDR detects and stops identity-based threats with a 3-minute response time and low false positives, helping protect faculty, and privileged accounts.

Budget-constrained schools can exclude eligible student licenses from billing and monitoring while focusing coverage on the identities that keep your institution running.

### Managed SIEM

Threats evolve. Your SIEM should too.

With Smart Filtering technology, we collect only what matters—reducing noise and accelerating response. Our SIEM simplifies compliance and delivers protection at a predictable price so districts and universities address controls expected by cyber insurers and regulators, while still fitting tight budgets.

### Managed Security Awareness Training (SAT)

Expert-backed training for safer teams.

Training content and simulations learners actually enjoy, managed for you to make administration easy. Powered by current threat intelligence, it helps teachers, staff, and even students recognize and report attacks so you see fewer security incidents.

NJCEC Huntress 24x7 Managed SOC Solution, 1Year	100+	250+	500+	1000+
Managed (EDR) Endpoint Detection and Response	72.89	59.29	50.19	40.29
Managed (ITDR) Identity Threat Detection and Response (M365, GWS)	32.89	30.69	28.49	26.49
Managed (SIEM) Security Information and Event Management	31.89	25.59	24.69	23.89
Managed (SAT) Security Awareness Training	15.99	13.69	12.59	11.49
